

pH7 Technologies

Project Management

Job description:

Job Type: Full-Time

Job Location: Metro Vancouver, BC

Salary: Commensurate with experience

pH7 is looking for a Project Manager to join our growing company. As a project manager, you will support our team in ensuring key projects are on schedule and on budget. You will help coordination functional team between departments to support the development of business and manufacturing goals.

You will be responsible for assigning tasks to the right team members, checking on their progress, and ensuring that each project is completed on time and to the highest standard.

Responsibilities:

- Organize and plan project tasks and schedules.
- Partner directly with internal and external stakeholders to Earn Trust and facilitate planning meetings, scope efforts, set project priorities, achieve milestones, and ultimately drive delivery.
- Facilitate and encourage collaboration across departments to ensure projects are completed successfully.
- Assess issues which impede successful project handover between teams and escalate through leadership, proposing actionable resolutions.
- Receive, track, and deploy the standard bill of materials required for the end user, to safely operate building spaces after the building/project launches.
- Provide project updates to stakeholders as per demand and requirement.
- Be aware of industry best practices, techniques, and standards, and encourage team members to use them for effective project execution.
- Stay aware of company goals and strategies to ensure projects align with business priorities.

Qualifications:

- 7+ years of working cross functionally with tech and non-tech teams experience.
- 5+ years of engineering project management experience
- Experience owning program strategy, end to end delivery, and communicating results to senior leadership.
- A bachelor's degree in chemical or mechanical Engineering or related engineering fields
- Project management professional (PMP) certification.
- Knowledge of project management methodologies such as DACI and best practices
- Strong interpersonal and team leadership skills
- Ability to manage multiple projects simultaneously.
- Proficiency in Microsoft Office tools

PREFERRED QUALIFICATIONS:

- Chemical or Mechanical Engineering Degree
- A career trajectory that demonstrates increasing levels of responsibility and proven success delivering business results
- Strong organizational, time management, and verbal and written communication skills
- Demonstrated ability to dive deep, identify root causes, and execute solutions.
- Ability to travel internationally.

How to apply:

If you are looking to join a dynamic and innovative company and make a significant impact in the world, please submit your resume and cover letter to HR@ph7technologies.ca

We thank all applicants for their interest; however, only those selected for an interview will be contacted.
